

## Topic: Last Changes in Duphunter Professional

---

Last Change: May 2012

### Version 9.6.3927

- **Solved:** Sometimes an access violation occurs when clicking on a file in the result tree
- **Improved:** If the search process has been saved automatically, unattended export was prevented.

### Version 9.6.3925

- **Solved:** Dialog "Load Job" sometimes refer to an empty directory
- **Solved:** Export folder sometimes refer to an empty directory

### Version 9.6.3924

- **Solved:** Dialog "Load Job" sometimes refer to a wrong directory
- **Solved:** Export folder sometimes refer to a wrong directory
- **Changed:** System recognition improved
- **New:** More English PDF documentation
- **New: Quick Search in the main window**
- **Changed:** Back-up folder for saving the search result changes to program folder, not longer to AppData. And a new message provides information about the internal use of this back-up.
- **Changed:** Uninstall function improved
- **New:** New Help System based on a huge number of PDF files
- **Removed:** Help files of old CHM format
- **Solved:** Translation for the text export
- **Solved:** Translation of export confirmation fixed
- **New:** Support of clipboard in the result window
- **Changed:** Help System only online on our website
- **Changed:** Thousand Separator internationalized
- **Changed:** Keyboard support for Ctrl-Left and Ctrl-Right in the search job creation
- **New:** A new dialog box displays after exporting the file name and the location and allows you to open the export folder or export file.
- **Solved:** Exporting selected files led to errors when no file was selected.
- **Solved:** Deletion of the last saved search result was not possible.
- **New:** Full-screen view of the results window can be switched off

### Version 9.6.3920

- **Changed:** Program interface for classic Windows style optimized
- **Changed:** Manually input of search folder is now possible
- **Changed:** Input of network drives solved
- **Changed:** File DH\_Content.txt now Unicode compatible
- **Changed:** File pattern dialog optimized (All Files, Use Dates...)
- **Changed:** Installation for Windows Vista and 7 optimized
- **Changed:** Reference folder selection only visible, if the whole tree is in the scope
- **Solved:** Sometimes selections failed, if scope "Whole tree" and "Current group" was not changed on program start
- **New: Old structure of folders can be created during file movements.**

### Version 9.5.3914

- **Changed: result window completely re-designed**

- **Changed: search up to 15 % faster!**
- **Changed: Default value for ZIP password obligation changed.** Now by default this option is not longer active and by that unencrypted ZIP archives can be created. Administrators should consider this and modify this setting manually for normal users, if necessary.
- **Added:** single confirmation, whether you wish an automatic program update check or not. You find this option also in the program options under "Online Update".
- **Added:** selection „Keep longest file name“
- **Added:** selection „Keep longest folder names“
- **Added:** selection „Keep current file“
- **Added: export of full list to TEXT**
- **Added: export of selected files to TEXT**
- **Added: export of selected files to XML**
- **Solved: search inside the result tree was not available.**
- **Solved: owner of a file was not displayed.**
- **Solved:** some small corrections
- **Added:** more music file extensions (cue, lsw, cmp..) under "pre-selection"
- **Changed:** all selections **alternatively** for the **whole tree** or **current file group**

### Version 9.0.3911

- **Changed:** Installation under Windows 7 and Vista optimized
- **Changed:** Small corrections

### Version 9.0.3910

- **Added: F12** can be used to scale down the main window size to the smallest available size. This is useful, if a greater window size was saved, but in the meantime the resolution was scaled down.
- **Solved:** The welcome dialog was displayed during the search, when using command line parameters.
- **Changed:** Font size in result window adjustable.

### Version 9.0.3908

- **Added:** Pre-selection menu with more file types (+archives, +manuals)
- **Changed:** Installation under Vista and Windows 7 improved
- **Changed:** Dialogs optimized for 900 x 720 Pixel
- **Changed:** Improved interface in the job creation with new shortcuts

### Version 9.0.3905

- **Solved:** Language changing of file pattern pre-selection
- **Solved:** Translation of folder dialog
- **Solved:** Automatic language selection acc. to Windows system
- **Solved:** Reference folder selection
- **Solved:** Sanitizing limit of 20 files for registered users removed
- **Changed:** Improved progress indicators during the deletion
- **Changed:** Update mechanism improved
- **Changed:** Selection inside of the result tree improved

### Version 9.0:

- **Full compatibility with Unicode UTF-16**
- **For Windows 2000 and higher. Windows 9x no longer supported!**
- Export of search protocol to XML format

- Export of search results to XML and CSV formats
- [New user interface](#)
- Lesser dialogs
- Easy language switching
- No further export to DOC
- No further export to XLS format, please use CSV
- No CRC-32 hash algorithm, because it's unsecure
- Process priority adjustable for each search job
- No SQX compression, because the development has stopped
- [New ZIP compression as replacement for SQX](#)
- Big font size with 12 Twips
- Pausing of search possible
- Mouse hints in result window can be switched off
- Calling from Explorer context menu possible
- [Job folder can be defined by admin \(protected\)](#)
- Job folder adjustable
- [Password protection for ZIP archives can be defined by admin \(protected\)](#)
- [Export of selected files](#)
- Export of owner names of files
- Export of hard disk serial numbers of files (usable as hardware reference)
- Verbose log files with more information
- [256 bit AES encryption for ZIP archives](#)
- New incompatible format for job files!
- Alternatively export of all files or selected files (usable for exports sorted by Business sub segments or departments)

## Your cooperation will help us very much:

If you see this document or inadequacies in the program yet, please do tell us. We take every suggestion from you in order to achieve further improvements.

You can contact us at any time. Send a message to [support@dupehunter.com](mailto:support@dupehunter.com).

Thank you for your patience and cooperation. We hope that this document has helped you.
